ABOUT

I work full-stack but my main focus is the front-end and creating beautiful UI and UX using VueJS, SCSS, and more. I like companies that build their success on professionalism and strong ethical values. I am a self-starter. I work with minimal direction and meet deliverables on a regular basis.

ABILITIES

MOST RECENT JOBS

- **03/2017 - present: SiteZeus - www.sitezeus.com**
(Senior Software Developer, Full-Time)
Product: SiteZeus location intelligence technology platform.

Main developer and architect for the new front-end architecture realized in Vue.js, Vuex, TypeScript, Google Maps, and integrating it with the legacy front-end that is built on older Knockout code. Created a new foundation for all the new components in Vue, developed many custom components, improved performance and time to delivery for new functionality by establishing best practices, standards, unit tests requirements.
- **09/2016 - 03/2017: Tribridge - www.tribridge.com**
(Senior Software Developer, Full-Time)
Product: HCM Cornerstone Custom Integrations Reporting.

Mainly front-end development and user experience using different MV* front-end frameworks. Completed several Custom Reporting Solutions for Dunkin Brands (Dunkin' Donuts/Baskin Robbins), American Express and others.
- **07/2015 - 09/2016: Cazton - Remote - www.cazton.com**
(Software Engineer, Contract - Client: Wilmer Hale (<http://www.wilmerhale.com>))

Worked on a database-driven forms system based on Knockout, Kendo UI, Twitter Bootstrap, ASP.NET MVC, SQL Server using an EAV architecture (Entity, Attribute, Value) for database storage.
- (See Word copy of resume for additional history and details)
